WSSLM	BEA 8.0	WSSLM SPOT	D2RR
	BEA 8.0	WSSLM AT&L SOA	A2R

Urban and Regional Information Systems Association (URISA)

Conference Review

URISA Conference Review Agenda

- **Background/History**
- **Address Problem**
- **Current Status**
- **Next Steps**

Background/History

Dec 2001: DoD Manual 4525.8, "DoD Official Mail Manual"

- **The DoD installation is responsible for assigning city-style, street addresses on the installation.**
- **Street addresses shall be assigned and used even though a DoD activity may deliver the mail to the addressee.**

Nov 2004: BEA release 2.3

- **ADDRESS entity was added. This structure allowed for addresses of places or organizations, not just for persons. Street address was decomposed into its four component parts.**

Dec 2004: Department of Defense Directive (DoDD) 8320.2, "Data Sharing in a Net-Centric Environment"

- ***"Data interoperability shall be supported by making data assets understandable and by enabling business and mission processes to be reused where possible."***

Aug 2006: **Real Property Information Model version 1.1 released**

- **Included the four component parts of the BEA address**

Mar 2007: DoDD 8320.03, "UID Standards for a Net-Centric Department of Defense"

- ***"Develop and promulgate policy guidance for defining, implementing, and maintaining location UID standards..."***

Aug 2010 Address elevated to the BECCM COI

Address Problem

Lack of A Common Address Standard Impedes:

- **Obtaining reduction in United States Postal Service (USPS) mailing costs**
- **Automated validation of addresses**
- **Identification and correction of poor quality address data**
- **Exchange of address data across DoD communities**
- **Effective integration of addresses into GIS**

Current Status

URISA/NENA Addressing Conference

- **Federal Geographic Data Committee (FGDC) draft standard expected to be approved by Dec 2010**
- **It will then be a federal standard that will facilitate the collaboration of the GIS, emergency services, postal, logistics, and related communities regarding address data**

Next Steps

BECCM COI Governance Process

- Assess Topic
- **Formulate Scope & Guidance**
- Functional Requirements/DRAFT Recommendations
- Approval of Functional Approach
